

AMENDMENTS TO THE CLAIMS

The following Listing of Claims will replace all prior versions, and listing of claims in the Application:

Listing Of Claims:

1. (Currently Amended) An identified structure of a controlling bulb and a normal bulb of a decorative light string comprising:

 a first holder having on a periphery, ~~two pairs~~ a first and second pair of grooves, said first holder receiving said controlling bulb;

 a first socket, said first socket having a first and second pair of projections and receiving said first holder therein, said projections extending inward from an inner surface of said first socket, each projection from said first pair of projections being diametrically opposed to one respective projection from said second pair of projections;

 a second holder being different in groove arrangement from said first holder ~~having two grooves~~, said second holder receiving said normal bulb; and

 a second socket, said second socket having ~~two~~ projections corresponding to said groove arrangement of said second holder and receiving said second holder therein, said projections extending inward from an inner surface of said second holder and being diametrically opposed each to the other, whereby said first holder
